PROFESSIONAL SUMMARY

Frontend Developer with +5 years of experience across web development and technical support, including 3+ years building production React and Next.js applications. Skilled in TypeScript, JavaScript, HTML5, and CSS3, with hands on experience in React Native, RESTful API integration, and responsive. Turns approved designs into fast, reliable, cross browser user interfaces. Native Arabic speaker, fluent in English.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3
Frameworks: React.js, Next.js, React Native, Angular, Vite
UI & Styling: Tailwind CSS, Mantine UI, Responsive Design, Arabic/English RTL Interfaces, UI/UX Implementation
Integration: RESTful APIs, WebSockets, Socket.IO, JWT, OAuth2, OpenAI APIs
Backend & Data: Node.js, Fastify, Express.js, MongoDB, Strapi CMS
Microsoft & Cloud: Microsoft Fabric, Microsoft Foundry, Copilot Studio, Acronis
Tools: Git, Postman, Google Tag Manager, Linux, Nginx, PM2

PROFESSIONAL EXPERIENCE

Technical Business Development Specialist | **IT Supporters** | *2026 – Present*

- Build and configure AI agents on Microsoft Foundry and custom copilots in Microsoft Copilot Studio, connecting them to external APIs, company data, and automation flows.
- Customize Microsoft Fabric workspaces, pipelines, and data models for client analytics, and work with Acronis for backup, recovery, and data protection.

Full Stack Developer | **Zainlee Technologies LLC** | *Jul 2025 – 2026*

- Designed and developed SaaS dashboards and user interfaces with React, Next.js, and TypeScript, serving a growing base of enterprise clients.
- Engineered and deployed the company's production Next.js website with an integrated OpenAI chatbot, contributing to measurable improvements in lead capture and user engagement.
- Connected frontend interfaces to REST APIs and real time Socket.IO services, reducing manual coordination overhead across engineering and operations teams.
- Implemented secure JWT and OAuth2 authentication flows across multiple client facing applications, backed by Fastify and Express services.
- Integrated Twilio and LiveKit to deliver voice based AI agents within the Nawaa SaaS platform.

Full Stack Developer | **AskUs Platform** | *2023 – 2025*

- Built and maintained frontend interfaces using React and modern JavaScript frameworks, improving usability and reducing reported UI issues by a significant margin.
- Led development of internal tools and platform features that improved operational workflows across engineering and support teams.
- Integrated frontend features with Node.js and MongoDB backend services, supporting application stability across a high traffic platform.
- Worked directly with product and engineering leads to scope, build, and ship improvements on short release cycles.

Technical Support Specialist | **AskUs Platform** | *2021 – 2023*

- Diagnosed and resolved frontend, backend, and workflow issues for platform users and internal teams.
- Acted as a bridge between support and engineering, identifying recurring bugs and translating them into actionable development tickets.
- Maintained detailed documentation of technical issues and resolutions, building an internal knowledge base that reduced average resolution time.

KEY PROJECTS

Studiyo — *React, Next.js, TypeScript, Tailwind CSS, Node.js, Express, MongoDB, Strapi CMS*

- Developed a full stack CRM and CMS platform for managing educational programs, student records, bookings, and website content.
- Built analytics dashboards, booking management flows, and role-based access control within the CRM.
- Implemented the CMS dashboard with full CRUD functionality for blogs, pages, galleries, and tags, with authentication protected admin routes.

Nawaa — *React, Vite, Mantine UI, Fastify, Node.js, MongoDB, Socket.IO, OpenAI, Twilio, LiveKit, JWT/OAuth2*

- Full stack SaaS platform enabling businesses to create AI chatbots, voice agents, and AI generated websites through an intuitive dashboard.
- Implemented real time service creation workflows with Socket.IO and automated chatbot configuration via OpenAI API integration.
- Integrated Twilio and LiveKit for production grade voice AI agents, and secured the platform with JWT and OAuth2 authentication.

Zainlee Technologies Website — *Next.js, TypeScript, Tailwind CSS, OpenAI API, Google Tag Manager*

- Developed the company's production website with an integrated AI chatbot, contact form API routes, and lead management functionality.
- Implemented conversion optimization features and analytics tracking via Google Tag Manager.

Employee Management System with AI Assistant — *React, Node.js, Express, MongoDB, OpenAI API*

- Built a full stack employee management platform supporting natural language commands for adding, updating, searching, and deleting records via a conversational AI interface.

EDUCATION

Bachelor's Degree in Informatics Engineering
Graduated 2025 • Completed alongside full-time professional experience
